Australian National University

Are you from industry, government or the innovation sector?

We seek your participation and engagement for:

CLIENT PROJECTS: Be the client of a project undertaken by a team of students.

STARTUP PROJECTS: Students pitch a start-up idea, build a student team and bring their ideas to life.

MENTORS: Help students and teams along any part of this project life cycle with your expertise.

CS.ANU.EDU.AU/TECHLAUNCHER

TechLauncher is an initiative that enables students from any discipline to develop the research and professional skills required to make great ideas a reality and have a positive impact on our society.

FOR STUDENTS

Develop your research and professional skills by working closely with industry professionals, technology experts and entrepreneurs.

Create a start-up business or complete a real-world project for your client.

Students studying any degree in any discipline can participate in TechLauncher through courses VCUG3100 and COMP3710.

Apply your art, commercial, legal or other skills in a multi-disciplinary context.

Gain course credit towards your degree by enrolling in courses associated with TechLauncher.

FOR INDUSTRY

Gain technical competencies from the next generation of technology and entrepreneurial students

Identify student talent early for your own organisation or government agency, through engaged project work with student teams.

Identify investment opportunities.

Provide mentorship to build a supported and collaborative Canberra.
