

COMP1730/COMP6730

Programming for Scientists

Final exam information

Exam time

- * Time: Monday, 7th November 2022.
 - COMP1730 students starting at 2:30pm
 - COMP6730 students starting at 2:40pm
- * 3 hours and an extra 10 min for uploading and checking uploaded files.
- * Students with special exam arrangements (e.g., in EAP) will have extended time.
 - Check submission deadline on Wattle 2 days before the exam! If it doesn't match, please contact us at comp1730@anu.edu.au.
- * If the exam time is from 10pm to 7am in your time zone, please contact us immediately!

Permitted materials

Open book exam with any materials, provided that:

- * These materials are available before the exam started. Those posted during the exam (e.g. in 'cheating' websites) are strictly prohibited!
- * You must provide the exact URL to an online material that you used, so that we can directly identify its relevance to the exam.
- * Only materials in English are allowed.

Cheating, plagiarism and misconduct

The exam is individual!

- * Any sign of collaborations or suspicious behaviour will be investigated.
- * If you are found with academic misconduct, not only we apply mark penalty, but the record will also be retained at the University.
- * Repeated offence may be documented in your transcript!

Types of questions

4–5 free-text answer questions in quiz format– you must write your answers into the answer box.

- * 4-5 programming questions that you need to write some code into the answer box (similar to homework), but we only mark code functionality (no code quality is considered except that implementation comments explaining your code should be included. You may get partial marks if you describe what you intended doing.)
- * Look at (better solve) lab 10 for examples of previous exam questions!
- * COMP6730 students will get additional

Support during the exam

- * Exam paper will be posted on Wattle and answers can be submitted on Wattle, just like homework or project assignment.
- * The Teams channel 'Final exam Q and A' will be actively monitored during the exam.
- * You can post exam-related questions there and we will answer quickly.
- * We can't help with technical problems at your end, such as computer system or Python environment.

Recording your attempt

- * We may select some students for validation, which may change your mark as a result.
- * If requested, you can instead provide a recording of your attempt.
 - Recording must show your screen activity.
 - A video of yourself sitting the exam.
 - Show your student ID card (or any other ID card) at the beginning of the video.
- * As an example, you can start a new Teams or zoom meeting with yourself, turn on the recording and save it to the cloud or your local computer.
