Cyber Security

 **ACSC**  
AUSTRALIAN CYBER SECURITY CENTRE

## We work to protect:

- Australian governments
- The private sector
- Critical infrastructure

## From:

- Cyber espionage
- Cyber crime
- Issue motivated groups

# Case study

## Bureau of Meteorology target of 2015 cyber attack, Prime Minister Malcolm Turnbull confirms

By political editor [Chris Uhlmann](#)

Updated 21 Apr 2016, 2:38pm

**The Federal Government has confirmed for the first time the Bureau of Meteorology was the target of a cyber attack.**

Last year, [the ABC uncovered a state-based intrusion into the Bureau of Meteorology that infected its entire computer network.](#)

The threat is persistent, aimed at stealing information, and will cost hundreds of millions of dollars to fix.

# How we combat these threats

- Cyber security incident response
- ICT system forensics and specialist assistance
- Vulnerability assessments
- Education and awareness
- Publications

# Data: Technology, Engineering and Science

ASD

- Computer Security
  - Abnormality recognition (APT)
- Audio processing / modelling
  - Language modelling, speaker modelling
  - Speech to Text [linguistics]
  - Code switching [linguistics]
- Image / Video processing & modelling
  - DNN approaches with acceleration
  - Face / Scene / Object / Text recognition

# Data Science Domains

- Computational Linguistics [reducing search space]
  - Triage / topic modelling
  - Semantic understanding
- Ux [deploying AI/ML effectively]
  - ML mediated Ux
  - Personalised Ux for DS/AI
- Visualisation of complex data
  - **Open Sourcing through Data 61**
- HPC-based ML
  - **Needed for scaling out**

“Scale of the data and required compute prioritises sub-optimal approaches with feasible computational cost over optimal approaches with high computational cost”

# ASD – ANU Joint Facility

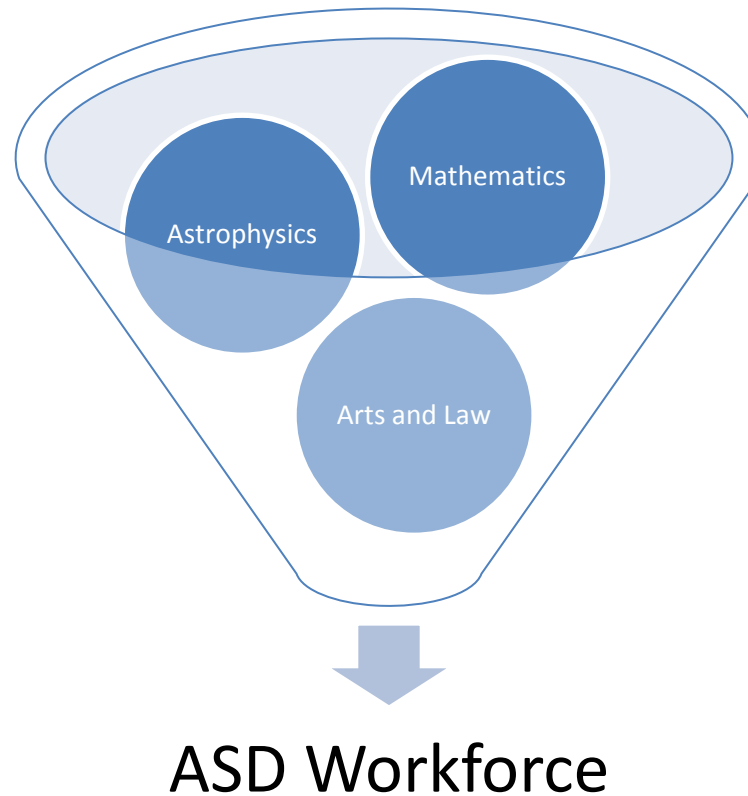

- Data Science
- Cyber Security
- Advanced Mathematics
- Minor domains
- Collaborative Research
- Graduates and academics
- Public STEM outreach

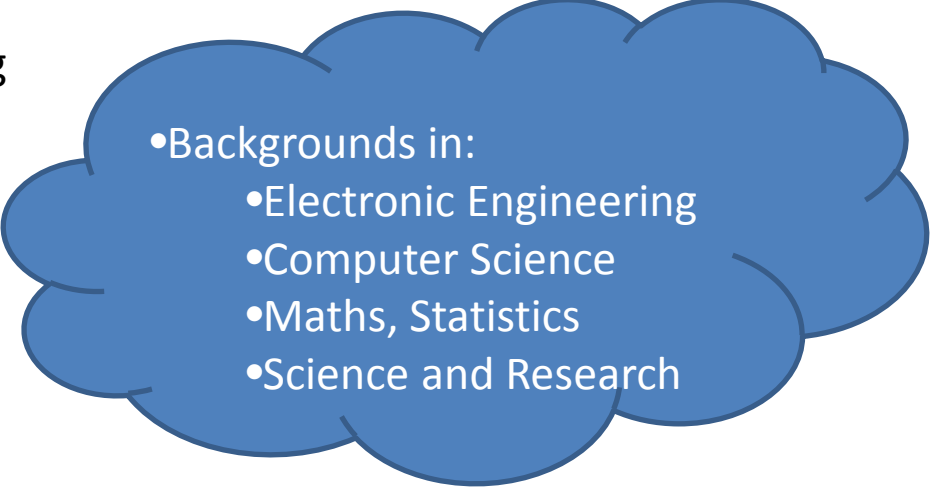

# Many different paths...

-some personal examples-

# We want you...

- Software design, development and support
- Network and system engineering or administration
- Cyber security vulnerability research and incident response
- Malware analysis and penetration testing
- Computer and Information Security
- Advanced Mathematics
- Computational Linguistics

- 
- Backgrounds in:
    - Electronic Engineering
    - Computer Science
    - Maths, Statistics
    - Science and Research
