

COMP1140/1110/6710

Structured programming

Revision – Mid-Semester
Exam

The mid-semester exam

- * is scheduled 6.30pm AEST on Friday the 23rd of September;
- * is 45 minutes;
- * is on-line: access/submit through exam gitlab;
- * is open-book: you may refer to course material, notes, documentation, search the web, etc;
- * is individual: you must not communicate with anyone other than the course staff through private posts on piazza.

* This week

- Ensure you have a working IDE
- Clone the exam repository to the computer you will be using for the exam.
- Complete the practice problem (HelloWorld) and push to verify that it is working.
- Access to the repo will close on Thursday.
- Setup and test self-invigilation (optional).

* During the exam

- At the start, pull updates from your exam repository – it will now have questions in it.
- push your work as you complete it.

Self-invigilation

- * You record yourself during the exam.
- * You keep the recording.
- * If we find cause to doubt the integrity of your exam submission, then you may submit your recording as evidence in your favour.
- * For a recording to be useful, it must:
 - show your entire screen (at readable resolution);
 - identify you, with audible sound;
 - for the entire duration of the exam.
