Konrad Zuse

22/6/10 – 18/12/95

Z3
Zuse designed and built the world's first Turing-complete digital computer, May 1941.

Plankalkül
Realizing how impractical it was to write programs at a low level, Zuse developed the world's first high-level programming language (1941-1945). Unfortunately, the impact of this language was greatly reduced by the virtue of Zuse having made these developments in wartime Germany.
