ACM

Barbara Liskov

7/11/39 –

CLU
Liskov and her students at MIT developed CLU in the 1970's. CLU extended ALGOL with data types that had code that operated on them; an important step in the development of object-oriented languages.

Argus
Liskov lead the development of Argus in the 1980's. Argus was the first high-level language to support distributed programs.

Turing Award 2008
